tiktok is very strict with moderating their platform and have been known to completely shut down and delete accounts that they suspect of hacking or cheating even if these tiktok coin generators systems worked they wouldn't be worth the risk

the easiest way to determine how much you could potentially earn from tiktok is to enter your username in our tiktok influencer engagement and earnings calculator which you will find near the top of this post we developed this tool to provide potential earning guidelines to influencers ultimately a brand and an influencer negotiate what they consider to be fair value we stress that this is only an estimation and can vary greatly by niche country audience location and audience brand affinity

suppose there is a user who actively spend time on your videos and you want to show some love towards them you can simply send a diamond to them and express that you value them very much this is how the coins are working on tiktok

the tiktok money calculator allows you to calculate your estimated earnings from your tiktok account if you believe you are an influencer based on your engagement and number of followers this is for the western version of tiktok not the chinese version douyin

diamonds are a virtual currency that's only used by streamers on tiktok its sole purpose is to store value before a streamer cashes out diamonds can't be used for anything else and can't be sent to other users

well tiktok coins are nothing but virtual money that you can spend to buy other virtual items such as diamonds and other resources on tiktok it's similar like we buy gems on various games like clash of clans you'll spend your real money there are free methods also to buy coins using your google play account and then you can spend those coins to buy tiktok resources you can then gift those resources to other users on tiktok as a form of appreciation or love

obviously the higher your engagement rate the more successful brands will consider you and the higher they will be willing to pay it is difficult to find overall engagement rates for tiktok all the published ones appear to wrongly equate engagement with the percentage of people opening the app once a day however like most social media networks you can calculate your individual tiktok engagement with the following formula $\frac{\text{number of hearts} + \text{number of comments}}{\text{number of followers}} \times 100$ you can calculate this either for a single post or overall we suggest that you add together the figures for your last 20 posts when you make this calculation overall
